future

summary

value proposition

declutter meaningfully

problem

People often find themselves keeping a lot of clutter. Many of these objects stay because they hold sentimental value, but not necessarily functional use.

solution

Flutter adds emotional security to the decluttering process, allowing people to find others who will value or add meaning to the item.

initial point of view

how might we
convert sentimental objects into
new experiences that don't take
up physical space?

experience prototype

sketches

- Simple context emphasizes the items' meanings
- Focus on location encourages face-to-face experiences
- Privacy concerns related to location data

Lo-fi

Simple: Find an item

Medium: Give an item

Complex: Connect & create new experiences
